

# SATYA SIVA SAI HARSHITH JYOTHULA

## React Frontend Developer

+91 8106850859 | [saiharshithjyothula@gmail.com](mailto:saiharshithjyothula@gmail.com) | [LinkedIn](#)

### Summary:

Experienced React developer with a strong foundation in frontend technologies. Demonstrated success in delivering visually appealing user interfaces and collaborating effectively to translate business requirements into scalable solutions. Upskilling myself to become a full stack developer.

### Skills:

**Programming Languages:** JavaScript (ES6)

**Libraries/DB/Tools:** ReactJS, Redux, Node JS, Express JS, Next JS, Jest, MongoDB, Git

**Web Technologies:** HTML5, CSS3, SASS, Tailwind CSS, Material UI, Next UI

### Projects:

#### **Bank Account Opening Application:**

- Cognizant Technology Solutions

**Tech stack:** ReactJS, Material UI, React Router, Context

- Developed a Bank Account Opening application, enhancing user experience with features like seamless session continuation for users who dropped midway.
- Integrated Vouched for streamlined user details retrieval from government IDs.
- Implemented secure authentication, data validation, and backend system integration.

#### **Bank Self Service Portal:**

- Cognizant Technology Solutions

**Tech stack:** ReactJS, Material UI, React Router, Redux

- Developed a Bank Self-Service Portal, empowering users with OTP-based login, autopay, online payments, and comprehensive access to loan details and transaction history.
- Implemented various functionalities, elevating the portal's usability, including secure document uploads and real-time transaction notifications. Employed a dynamic, efficient, and feature-rich platform for users' banking needs.

#### **AI based Chatbot like ChatGPT:**

- Remote

**Tech stack:** ReactJS, Next UI, Tailwind CSS, Redux

- Developed an app which is an AI-based chat application that is designed to help people with mental health disorders.
- The application uses Open AI in the backend to generate responses.
- Users can log in to the app, and their chat history will be saved if they log in again.
- The application also has a user feedback mechanism that allows users to provide feedback on the quality of the responses.
- Additionally, the application supports multiple languages, which makes it accessible to a wider audience.
- Users can also search for information using voice commands, which makes the application more user-friendly.

#### **Book Store Ecommerce App:**

- Remote

- Built ecommerce bookstore app using the MERN stack, with functionalities including book filters, sorting, searching, admin & user dashboards.

### Experience:

#### **Associate:**

- Cognizant Technology Solutions | Jan 2022 - Present

- Contributed to the development of scalable web applications in React, enhancing user interfaces.
- Collaborated on diverse projects, done POCs, providing code assistance to team members.
- Achieved consecutive 5-star rating for the second time.

#### **Programmer Analyst:**

- Cognizant Technology Solutions | Jan 2021 - Dec 2022

- Collaborated with cross-functional teams to execute crucial programming tasks, ensuring the successful development of web applications.
- Recognized with a 5-star rating for proactively completing assignments and delivering reliable, efficient solutions.

#### **Programmer Analyst Trainee:**

- Cognizant Technology Solutions | Dec 2020 - Dec 2021

- Completed intensive web development training, gaining proficiency in HTML5, CSS3, JavaScript (ES6), ReactJS. Actively implemented ReactJS user interfaces, showcasing commitment to learning and overcoming programming challenges for team contributions.

### Certification: AWS Cloud Practitioner.

**Education:** Gokaraju Rangaraju Institute of Engineering & Technology | 2016 - 2020 | bachelor's degree in Electronics and Communication Engineering with 9.04 CGPA | Hyderabad.
